

**COPY OF E-MAIL FROM STEVE WALTON ON OCTOBER 19, 2004  
CONCERNING TSLG FOR NOTICE OF OCTOBER 25TH WEBCAST-CONFERENCE  
FOR TECHNICAL SEMINAR FOLLOW-UP**

Greetings,

Last Thursday, October 14, 2004, the Transmission Services Liaison Group (TSLG) held a seminar to provide an overview of the work completed to date on the market and operational design for Grid West's Beginning State. That work focused on providing a first order of detail for the Beginning State that shows the feasibility of implementing the features described in the Regional Proposal.

Approximately 70 people attended the Seminar, which covered region-wide services (transmission rights administration, transmission reconfiguration services, scheduling processes and responsibilities) and services that a consolidated control area would use to meet Ancillary Service needs (reserve and real-time energy markets).

As a follow-up to the TSLG seminar, a Webcast-Conference Call has been set up for Monday, October 25, 2004 from 10:00 am to 12:00 noon Pacific time. Questions taken during the seminar and those received by close of business yesterday (October 18th) will be reviewed during the call. This call will be much like our previous conference calls this summer, except that PNGC has made their webcast facilities available to us to allow view of material during the call. We greatly appreciate PNGC making their facilities available to us.

To make best use of the 25-30 available dial-in ports, those located in the Portland Area are encouraged to come to PNGC's offices in the Lloyd Center area of Portland rather than call in. For those not able to attend at PNGC, please conference participants from a common location where possible, and call in from a single number to minimize port usage. The location of PNGC's offices and the details for dial-in participation are shown below.

We look forward to your participation next Monday.

Steve Walton  
Grid West Coordinating Team
